STL ECLIPSE[®] OPTIC TECHNOLOGY

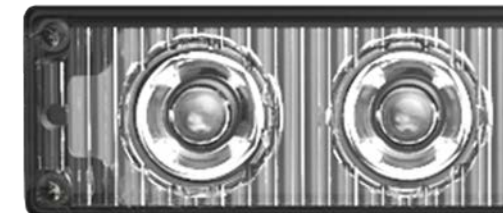

ECLIPSE[®] TIR OPTICS:

TIR Optics produce a highly concentrated beam of light for each individual LED creating a layering of light output as a result. This allows the TIR Optics to offer performance with fewer LEDs per module and a more precise focal output.

Specs:

- 70° horizontal spread
- 20° vertical spread

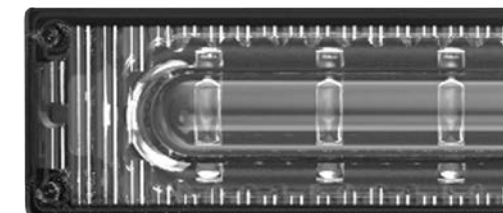

ECLIPSE[®] LINEAR OPTICS:

Linear Optics produce a wide broad beam of light for each LED module. With a powerful group magnification system, Linear Optics create ultra-wide light dispersal, allowing for greater off-axis visibility.

Specs:

- 110° horizontal spread
- 20° vertical spread

OUR MISSION:

Provide the most reliable and affordable warning lights and equipment, delivered fast with the highest level of service.

OPTIONAL MultiColor Upgrades

MultiColor upgrades are optional features available for select STL Light Bars. These upgrades enhance standard Light Bar functions, and can add additional functionality to your Light Bar. There are 2 types of MultiColor upgrades:

SUPER TAKE DOWN UPGRADE

The Super Take Down upgrade converts all forward facing LED modules into MultiColor LED modules. This upgrade retains your Light Bar's standard warning and Take Down functions (as shown above). Additionally, each MultiColor LED module activates steady burn Clear while Super Take Down mode is active.

TRAFFIC ADVISOR UPGRADE

The Traffic Advisor upgrade converts all Traffic Advisor LED modules into MultiColor LED modules. Each module flashes Amber while directional patterns are active or your select color while warning patterns are active. This ensures the proper signal is sent for the task at hand.

AVAILABLE CARBINE OPTICS

The STL Carbine Series offers 3 options for Optics. These available options include:

FLOODLIGHT OPTICS

Floodlight Optics provide a wider spread of light to better illuminate nearby areas.

SPOTLIGHT OPTICS

Spotlight Optics provide a narrower spread of light to better illuminate distant objects.

HYBRID OPTICS

Hybrid Optics are comprised of both Floodlight & Spotlight Optics, providing a balance in light spread.
